RECRUITMENT

Manens-Tifs is a consulting company, specialized in the field of engineering and project management for the building sector with special focus on sustainability and energy issues.

We have 47 years of history and 150 specialists in Italy working on projects in various parts of the world for some of the most renowned international architectural firms.

We believe in technical excellence and innovation to pursue new quality levels in the building industry that must evolve towards more sustainable environmental, economic and social models.

We are looking for people who are willing to pursue this endeavor with enthusiasm, modesty and dedication.

In order to satisfy a rapidly growing order book, we seek passionate engineers for the following positions in our offices in Verona, Italy:

For our Building Services (MEP) sector:

- **Ref. 2018-01 Mechanical Designers**
 - Required at least 3 years of building services design (mechanical and plumbing) for complex and large tertiary buildings (offices, hospitals, etc.)
 - Preferred good understanding of BIM with Revit software
 - Preferred good knowledge of English language
- **Ref. 2018-02 Electrical Designers**
 - Required at least 3 years of building services design (electrical, power and low-current) for complex and large tertiary buildings (offices, hospitals, etc.)
 - Preferred good understanding of BIM with Revit software
 - Preferred good knowledge of English language
- **Ref. 2018-05 Recent graduated Mechanical or Electrical Engineers**
 - Required recent degree in mechanical and/or electrical engineering
- **Ref. 2018-06 Special Systems Designers (Safety, Security, ICT, Audio Visual, BMS)**
 - Required experience in building services design (safety, computerized management, video surveillance, access control, security supervision, ICT, BMS) for complex and large tertiary buildings (offices, hospitals, etc.)
 - Preferred good understanding of BIM with Revit software
 - Preferred good knowledge of English language

For our Building Physics & Sustainability sector:

- **Ref. 2018-03 Energy Specialists**
 - Required experience in the use of dynamic energy simulation software (eg. EnergyPlus, IES, TRNSYS, eQuest) applied both to the building envelope and building services
 - Required degree and/or doctorate in engineering or physics
 - Required good knowledge of envelope thermal physics and HVAC systems
 - Preferred good knowledge of simulation software for daylighting (eg. Radiance)
 - Preferred knowledge of ASHRAE 90.1
 - Preferred good knowledge of English language
- **Ref. 2018-04 Sustainability Specialists**
 - Required qualification of LEED AP and/or BREEAM Assessor and/or WELL AP
 - Required engineering degree
 - Required experience of at least 2 years as a sustainability consultant in the construction industry
 - Required excellent knowledge of English language

Please send your CV to the e-mail address y1-03@manens-tifs.it indicating in the subject the reference code of the position you are applying for.
